## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on November 5, 2003 has been entered.

***Claim Objections***

Claim 9 is objected to because of the following informalities:

On line 11 of claim 9, the phrase "the stent having" is confusing with respect to the previous part of this claim because this same phrase was used in line 1 of the claim to recite numerous other elements (see line 1). For this reason, it is not clear how the previously recited elements fit in the context of set of limitations for the stent. In order to overcome this objection, the examiner suggests changing "the stent having" (on line 11) to ---the stent further having---. Appropriate correction is required.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 9-15 are rejected under 35 U.S.C. 102(e) as being anticipated by Moriuchi (US 6,013,854). Moriuchi anticipates the claim language where

(1) the plurality of annular elements as claimed are the plurality of windings of the helix structure of Moriuchi (see Figures 5 and 6),

(2) the serpentine structure with peaks and valleys as claimed is clearly shown in Figures 5 and 6 of Moriuchi,

(3) the at least one connector member as claimed is element(s) (111) and (113) of Moriuchi,

(4) the first segment as claimed is either end section (104) of Moriuchi,

(5) the second segment as claimed is the middle section (103) of Moriuchi,

(6) the first segment or end section (104) of Moriuchi has a greater flexibility as compared to the second segment of middle section (103) of Moriuchi because a thinner wire is used (see column 11, lines 26-35), and

(7) the cells as claimed are between the connections (111) and (113) of Moriuchi (see also column 10, line 54 to column 13, line 28).

With regard to claim 14, Nitinol is denoted as a nickel-titanium alloy (Hackh's Chemical Dictionary, 4<sup>th</sup> Edition, (1969), page 456). Since Moriuchi discloses using alloys of nickel and titanium (see column 12, lines 47-68), the claim language is fully met.

### **Conclusion**

Applicant should specifically point out the support for any amendments made to the disclosure, including the claims (MPEP 714.02 and 2163.06). Due to the procedure outlined in MPEP 2163.06 for interpreting claims, it is noted that other art may be
